Bug ID	Title	Description	Step to Reproduce	Expected Result	Actual Result	Severity	Priority	Screenshot	Comment
BUG_001	First Name field accepts special characters and excessive length	The First Name input field allows a large number of characters and special characters (Like - @3565), which is not expected for a name input.	1. Navigate to the Contact page 2. Click on the First Name input field 3. Enter a long string containing special characters	The First Name field should validate input to only allow alphabetic characters (and optionally spaces or hyphens) with a character limit 30.	The field accepts special characters and a long string without any validation error.	Minor	Medium	URL - https://drive.google.com/file/d/1HfBD7C85YaAyA-Mipcm8-mEcj4Mjn6lo/view?usp=sharing	This may lead to invalid data submission and poor user experience. Front-end validation should be implemented.
BUG_002	Last Name field accepts special characters and lacks validation	The 'Last Name' input field on the contact form accepts invalid characters such as numbers, symbols (Like: ..@123'), and allows unlimited character input without validation.	1. Go to the website: https://quantumitinnovation.com/contact-us 2. Scroll to the Contact Form section. 3. In the 'Last Name' field, enter '@123' or a long string of mixed characters. 4. Try to submit the form.	The 'Last Name' field should accept only alphabetic characters and restrict input to a reasonable character limit (e.g., 30 characters).	The field accepts numbers, special characters, and long inputs without any error message or restriction.	Minor	Medium	URL - https://drive.google.com/file/d/14E0OiyJbO-fpMjXfOj9KmYOAZsWYBpwV/view?usp=sharing	Validation rules should be implemented to ensure data quality and prevent invalid input.
BUG_003	Phone Number Field Accepts Excessive Digits	The phone number field accepts an unusually large number of digits (Like: over 100 digits).	1. Navigate to https://quantumitinnovation.com/ 2. Scroll to the Contact section 3. Enter a phone number with over 100 digits like 111111... (100+ times) 4. Submit the form	The phone number field should limit input to a standard phone number format (typically 10-15 digits) and show a validation error for excess input.	The field accepts large inputs without restriction or error.	Minor	Medium	URL - https://drive.google.com/file/d/12L5EPviQOelz2sk2siraVvtdkpGavSDf/view?usp=sharing	Input validation missing for phone number field.
BUG_004	Email field accepts excessively long input	The email input field allows users to enter excessively long strings without any character limit or validation.	1. Navigate to the Contact section on https://quantumitinnovation.com/ 2. In the Email field, input a string longer than standard email formats (e.g., 500+ characters). 3. Observe the behavior.	The email field should restrict input to a reasonable maximum length (e.g., 254 characters) and validate the email format.	The email field accepts extremely long input without validation or length restriction.	Minor	Medium	URL - https://drive.google.com/file/d/1O3V4lxJlg7u2scXVHUC8jy73MkgXAoI7/view?usp=sharing	Email validation and input length restriction should be implemented.
BUG_005	Image gets cut off after zooming in	When a user zooms into the webpage, certain images are not fully visible and appear cut off, affecting the user experience.	1. Open the website https://quantumitinnovation.com/ 2. Zoom in the browser view (e.g., using Ctrl + Plus or browser settings) 3. Observe image layout especially in service and portfolio sections.	Images should adjust responsively and remain fully visible on zoom-in.	Images get cut off or do not scale properly when zoomed in.	Major	High	URL - https://drive.google.com/file/d/1lSdGoNPtTc_Xvip8NEa772EPF-INSwGN/view?usp=sharing	Responsive design needs adjustment for zoomed views.
BUG_006	Image does not resize properly on zoom out	When the user zooms out the browser view, images on the webpage do not scale down and remain fixed, causing layout issues.	1. Open the website: https://quantumitinnovation.com/ 2. Press 'Ctrl' and '-' multiple times to zoom out. 3. Observe the behavior of images.	Images should scale proportionally and remain fully visible when zoomed out.	Images do not resize and remain large, causing them to be cut off or misaligned with other content.	Major	High	URL - https://drive.google.com/file/d/1mZlPTJRa5lqFngrWYtqVWT_E3gq5JWSba/view?usp=sharing	Affects user experience on different resolutions and zoom settings.
BUG_007	AI Chatbot Visible but Unresponsive	The AI/chatbot is visible on the website, but it does not respond to user input.	1.Visit https://quantumitinnovation.com/ 2. Locate the AI/chatbot icon (usually in the bottom corner). 3. Click on it and type a message like "Hello" or "Can you help me?" 4. Press Enter or click Send.	The AI should reply with a greeting or support.	No response is returned from the chatbot.	Critical	High	URL - https://drive.google.com/file/d/1ydkH9VXmfhoSwF84Ni3I57zlr3SkIKTP/view?usp=sharing	A non-responsive chatbot impacts user experience and support.
